Mr Harlan H. Kline
Ameron
Protective Coatings Division
Post Office Box 1020
Brea, CA 92622-1020

Dear Mr Kline:

We have received the necessary information to complete our evaluation of your coating.

Your clear epoxy polysiloxane resin and cure is chemically acceptable as a coating for application to structural surfaces or surfaces where there is a possibility of incidental contact with meat or poultry food product prepared under Federal inspection.

When this coating is applied to equipment, it must be in accordance with the standard for equipment design and construction in the publication "Accepted Meat and Poultry Equipment," MPI-2. This acceptance is valid as long as the composition and use remain as described to us.

No endorsement of the material or of any concomitant claims is intended.

Sincerely,

John M. Damaré, Chief
Compounds and Packaging Branch
Product Assessment Division
